lower gap	15 mm		
Brush seals	additional component		
Locking elements	by locking in the floor and with each other		
Profile color	your choice		
Handle	your choice		

Moveable dividing walls of the type G 3000 are extremely versatile when used in today's modern & demanding architectural situations.

They create transparency and allow entry of natural light in shopping centres, entertainment centres, bank foyers, hotels and restaurants.

There is the possibility and create separate spaces that at the same time give the effect of generous, broad areas.

Moveable glass dividing walls are at home in nearly every situation.
